

2027 Self-Funded Pharmacy Benefits

Save with HelpScript

Reducing out-of-pocket costs for medical benefit specialty drugs

To address the increasing cost of specialty medications, CDPHP® members will now have access to HelpScript, an independent company offering an innovative financial assistance program.

How it works

HelpScript adjusts copays by maximizing savings for both employers and employees.

Below is an example of how HelpScript works utilizing current plan design. This sample drug has been identified as having \$2,500 available per claim in copay assistance.

Current plan design	Current plan design with coupon	HelpScript utilizing current plan design
Drug cost: \$4,000	Drug cost: \$4,000	Drug cost: \$4,000
Copay: \$150	Copay: \$150	Copay: \$2,500
Coupon: \$0	Coupon: \$125	Coupon: \$2,500
Employee pays: \$150	Employee pays: \$25	Employee pays: \$0
Cost to employer plan: \$3,850	Cost to employer plan: \$3,850	Cost to employer plan: \$1,500

\$3,850 - \$1,500 = the employer plan cost savings of \$2,350

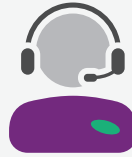

HelpScript is designed to help self-funded plans save money on medical specialty drug spend. The program can be added throughout the year.

When a provider starts your employee on specialty medications, HelpScript jumps into action and will help them enroll.

If your employee is already on the medication, HelpScript proactively reaches out to them.

Offers personalized support and guidance to employees navigating the complex specialty drug landscape.

Integrates seamlessly with existing medical benefits, minimizing disruption for members and providers.

The result is a cost reduction for the member and savings to the employer plan as well.

Lower copayments will increase the chances of the employee remaining on treatment, leading to better outcomes. It's just one more way **CDPHP is helping you save.**
