

Stronger pharmacy network coming soon.

National scale with local control.

Soaring prescription drug costs and volatility in drug pricing models require stability and the right strategic partners so that we can continue to provide the best coverage at the lowest price to our members and employer groups. That's why CDPHP has selected Express Scripts® Pharmacy Benefit Services (ESI) as our pharmacy benefit manager (PBM) effective January 1, 2027.*

Harnessing the scale of a national PBM strengthens our ability to:

- ✓ Manage rising costs
- ✓ Respond to market trends
- ✓ Expand our pharmacy network and offerings

While a few legacy programs are retiring, we are replacing them with stronger, more intentional solutions. **Legacy programs sunseting on December 31, 2026, include:**

- ▶ CDPHP Preferred Rx Network
- ▶ CDPHP Rx for Less prescription discount program

More options. Better quality. Increased savings.

With ESI, fully insured commercial and self-funded groups with pharmacy benefits administered by CDPHP will gain a stronger pharmacy network with a standard cost share model across all participating pharmacies, including CVS retail pharmacies. Standard cost share means members' pharmacy costs, like copays or coinsurance, are based on their health plan structure, instead of a preferred vs. non-preferred pharmacy network structure. This change expands our members' access to pharmacies and gives them more freedom of choice.

CDPHP commercial members will also gain a wide variety of clinically integrated pharmacy programs managed locally by our CDPHP Care Management and Clinical Pharmacy teams, designed to enhance member experience though:

- ✓ More options
- ✓ Better quality of care
- ✓ Increased cost savings

Smarter pharmacy benefits. Greater value. Local control.

Continual improvement remains at the heart of CDPHP, and we will continue bringing together the best of the industry with the best of our local expertise to deliver exceptional value and smarter pharmacy solutions.

Please note: 2027 plan-year updates for CDPHP Medicare Advantage are still in review. In line with prior years, we will update you on MA plan benefits once finalized with CMS.

* For all plans regardless of renewal date.
