

Advanced opioid management program

Prevent misuse. Protect employees. Control costs.

Opioid addiction is costing employers

\$7.3 billion a year.

Cost for employer groups to participate in the CDPHP Advanced Opioid Management (AOM) program? **\$0**

Opioid misuse drives significant medical and productivity costs for employers. Studies show, education and early intervention reduce the risk of addiction, overdose, and long-term spend. Our AOM program aligns with the Centers for Disease Control and Prevention Guideline for Prescribing Opioids for Chronic Pain to prevent misuse before it even starts.

AOM Program addresses potential behavior and safety gaps at each touch point:

At the pharmacy	With the member	At the doctor's office
Limits on initial opioid prescriptions: • Adults (18+): 7-day supply* (first 4 fills) • Under 18: 3-day supply (first 4 fills)	Educational outreach at a member's first opioid fill	Real-time alerts in EMR with guidance on: • Safe dosing levels • Duplicate therapy • Appropriate prescribing • Naloxone therapy recommendations for chronic opioid users
Dose safety checks.	Pharmacist intervention for high-risk cases	
Prior authorization for long-acting opioids (if applicable)**		

*The 7-day initial fill is a New York state law

**All pharmacy edits listed are bypassed when a member has cancer or is receiving palliative care.
