Top three things to know about CDPHP Vision plans

- 1 Frequency of benefits:** Depending on your plan terms, you're eligible to use certain benefits only once within a given time period. For example, your plan may allow coverage for one new pair of frames or contact lenses every calendar year. Refer to your member contract to find out the frequency of your plan's benefits.
- 2 In-network providers:** Your costs are lowest when you use an eyecare professional or retailer in the Davis Vision network, which includes 235,000+ points of access.
- 3 More covered frame options:** Members have the power of choice when it comes to frame selection. You can choose to either apply a frame allowance to any frame of your choosing at any participating provider location – **with an additional \$50 allowance at Visionworks** – or your eyewear is often completely covered if you select a frame from the Exclusive Collection.⁷ The Exclusive Collection is available at most participating independent provider offices and features three levels of frames: Fashion, Designer, and Premier, with retail values of \$100 - \$195.
